SUMMARY

Detail-oriented and results-driven Civil Engineer with a strong foundation in engineering principles, project management, and construction methodologies. Experienced in overseeing urban and building construction projects, ensuring compliance with safety regulations, and optimizing project workflows. Proven ability to collaborate with cross-functional teams to deliver projects on time and within budget while enhancing customer satisfaction and achieving financial savings.

EDUCATION

UNIVERSITY OF ARIZONA, Tucson, Arizona

M.S., Civil Engineering, 2012

B.S., Civil Engineering, 2011

TECHNICAL SKILLS

Civil Engineering Software: AutoCAD, Revit, SAP2000

Project Management: MS Project, Primavera P6

Construction: Site supervision, Quality control, Safety management

Building Codes: Familiar with local and national building codes and regulations

EXPERIENCE

WALMART, INC., Bentonville, Arkansas

Civil Engineer, Construction Management Team, 2011-2016

- Supervised construction projects for retail facilities across multiple states, ensuring compliance with engineering standards and safety regulations.
- Collaborated with architects and contractors to develop project plans and specifications, resulting in a 20% reduction in project delivery time.
- Conducted site inspections and quality control assessments, improving overall project quality and reducing rework by 30%.
- Managed project budgets and schedules, achieving a 15% cost savings through effective resource allocation.

ENGINEERING PROJECTS

Urban Development Project ● Civil Engineer ● Code ● Project

Led a team in the design and implementation of an urban development project, enhancing community infrastructure and accessibility.

- Utilized AutoCAD and Revit for design and visualization, ensuring compliance with local regulations.
- Coordinated with local government and stakeholders to address community needs and concerns.

Building Renovation Project ● Project Manager ● Code ● Project

Managed a comprehensive renovation of a historical building, preserving its architectural integrity while modernizing facilities.

- Developed project timelines and budgets, ensuring timely completion within financial constraints.
- Implemented safety protocols and quality control measures, resulting in zero safety incidents during the project.
